

Popular treatments	% success	protocol	comments
Wounds, internal and external including diabetic ulcers	95	100 pulses per square centimetre at energy level 4	Kills infection on and under the wound. Increases vascularisation.
Pseudarthrosis	90	Patient anaesthetised. Energy level 10. 1500 pulses both sides of the fracture.	Often used with metal supports in place. Avoids additional surgery and risk of infection.
Back pain	85	Aim at and around area of pain. Energy level 5. 600 pulses.	Maybe the most common pain.
Tennis elbow, calcified shoulder	90	1000 pulses at energy level 6	One treatment
Heel spur	90	1000 pulses at energy level 8	Usually local anaesthetic, one treatment
Erectile dysfunction and Peyronie's	75	As for a wound with six treatments fortnightly	Avoids drugs and surgery
Toe nail fungus and verruca	95	Same as wounds	Kills the infection
Cancer	80	300 pulses per tumour at energy level 4	Usually metastasised. Treat all areas and around. Important to get good nursing to repair damage caused by the cancer and wrong treatments. Success rate is higher the sooner the cancer is treated.

Notes:

Clinics have specialities, for example, physiotherapy, and may not treat all ailments.

Cancer is often outlawed by regulators in favour of chemotherapy and radiation. Some CellSonic users defy the regulators and if asked will say they are treating the pain of cancer.
